### **DETAILED ACTION**

1. The amendment filed on 3/24/2003 is entered. The rejections of claims 17 and 18 are maintained.

#### ***Claim Objections***

Claim 17 is objected to because of the following informalities: Claim 17, two last lines "said first FIFO" should be read --said first FIFO section--

#### ***Drawings***

2. Figure 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Figure 2 is objected to because the following informalities: MUX 9 should be read --DEMUX 9--

#### ***Specification***

3. The disclosure is objected to because of the following informalities: multiplexer 9 at page 1, line 18 and line 23 should be read --demultiplexer 9--

Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 17 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant

Art Unit: 2674

regards as the invention. This claim is not defined the values of "a" and "n", integer or decimal, even or odd.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 17 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kuwata et al (US 5,900,857) in view of Iwasaki (US 4,745,485).

8. As to claim 17, Kuwata et al teach a memory controller comprising a first FIFO section 2, a frame memory section 3, a second FIFO section 5, the timing control section 9 controls the image data RGB (6) is read out from the first FIFO section 2, and read out from the frame memory section 3 at a rate that is half of a rate at which the image data RGB (6) is inputted into the first FIFO section 2, the memory control section 4 controls writing into the frame memory section 3 (see figure 1, column 11, lines 44-67). Kuwata et al fail to teach a serial/parallel conversion. However, Iwasaki teaches a related memory controller which includes a serial/parallel conversion 2 (see figure 1). It would have been obvious to a person of ordinary skill in the art at the time of the invention to utilize the a serial/parallel conversion 2 taught by Iwasaki in Kuwata et al's memory controller because this would display the stable picture (see column 9, lines 61-64 of Iwasaki).

9. As to claim 18, Iwasaki teach a liquid crystal panel 10, a decoder 31, the memory controller 18 (see figure 7).

***Response to Arguments***

10. Applicant's arguments with respect to claims 17 and 18 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***
